

## PROJECTS

### Ecommerce Website with HTML CSS JS.

### Fitness Website with HTML CSS.

Designed front-view of my Fitness Website with pure CSS 3, Html 5 and JavaScript(for handling events).

### Snake Game with HTML CSS JS.

Snake is a classic video game from the late 70s. The basic goal is to navigate a snake and eat as many apples as possible without touching the walls or the snake's body.

### Weather App with HTML CSS JS.

In this weather app, you can get the weather details of a particular city by entering the city name or you can also get your current location weather details by clicking on the "Get Device Location" button. If you entered an invalid city name then there is shown an error message..

### Validation Form with HTML CSS JS

Basic Validation - First of all, the form must be checked to make sure all the mandatory fields are filled in. It would require just a loop through each field in the form and check for data. .

Data Format Validation - Secondly, the data that is entered must be checked for correct form and value. Your code must include appropriate logic to test correctness of data..

### Mobile Arena with HTML CSS JS.

A customer can easily open the website and see the Mobile-Features in their home within the certain time, which saves the time of the customers.
